

Frequently Asked Questions

(ver. 1.0 as of 01.02.2019)

Please note that the following Frequently Asked Questions refer to information on requirements for the projects consortia, application submission procedures as well as provide information on general procedures and rules for the 3rd BRICS Call 2019 launched under BRICS STI FP.

To find out more on particular details related to submission of certain national applications and eligibility criteria set by each particular funding agency, please refer to national annex of that particular funder provided on the Call announcement page at <http://brics-sti.org/?p=new/22>.

Contents:

Q1-Q8: Eligibility of proposals

Q9-Q17: Call procedures

Q18-Q23: Technical questions

Eligibility criteria**Q1: What are the requirements for the minimum size of the project consortium?**

A1: To be eligible for the call the consortium must consist of a minimum of 3 partners (all of them requesting funding) from at least 3 different BRICS countries.

Q2: We have 3 partners from 3 different BRICS countries, but only 2 of them request funding, is such project consortia is eligible?

A2: No, at least 3 partners should request funding and be eligible for funding from respecting national funding agencies. In addition to required number of eligible partners an extra partner can participate in the project on own costs. **The only exception from this rule is made for projects undergoing “STIEP” and “Research infrastructures, including mega-science projects” thematic areas** – those research consortia may have 2 partners requesting funds with 3rd partner participating on own costs.

Q3: How many partners can participate in one project as maximum?

A3: The project consortia can have partners from all BRICS member states as well as some additional partner from third countries acting on own costs.

Q4: Who is eligible for the call?

A4: Eligibility criteria are set by national funding agencies and may vary from country to country and even from one national funder to another. In general the call is targeting research groups, research institutions, universities, SMEs and other research performing bodies. However, please refer to national annex of your national funders, national call announcements or contact national funders directly to find out more on eligibility criteria.

Q5: Can applicants be involved in more than one project?

A5: The BRICS STI FP does not regulate this issue and it is completely regulated by national funding rules. Please refer to national annexes or contact relevant national funding agency.

Q6: Who is project coordinator and how to choose him?

A6: For the Call Secretariat project coordinator is a project partner who submits project application to Call Secretariat and serves as a communication point for the whole project. Project coordinator will be obliged to report to the Call Secretariat upon request (including project reports), so it is preferable that project coordinator is a partner who actually coordinates the project activities (if such role exists in the project). However, it is completely up to project partners to decide whom to formally nominate as a project coordinator and how to structure internal coordination of a project.

Q7: Is it necessary to provide a collaboration agreement with the proposal?

A7: Call Secretariat does not request to provide any drafts or signed collaboration agreements. However some funding agencies may require some additional documents to be provided in attachment to national application forms. In this case please contact your national funding agency to consult on the type and nature of documents to be provided in additional to certain national applications.

Q8: Does the topic of my project correspond to one of the call themes?

A8: Call Secretariat does not authorized to evaluate if the proposed research topic complies with one of the call themes and therefore does not provide that kind of assessment on requests. Compliance of research proposal with selected call theme will be a subject of application evaluation process.

Procedures

Q9: So many applications and deadlines for proposal submission, I'm confused. Who and how should submit applications, can you make it simple and explain once again?

A9: A project coordinator must submit 1 proposal (Joint Application Form) to the Call Secretariat (via BRICS STI FP AMS at <http://ams.rfbr.ru/BRICS/>). Other partners of the project do not have to submit any additional proposals to the Call Secretariat. However, each project partner (including project coordinator) in addition to submitting JAF to the Call Secretariat must submit national applications to respecting national funding agencies (in accordance to the rules of those national funding agencies).

Q10: There are different deadlines for submitting application to Call Secretariat and national funding agencies, which one to follow for our project?

A10: Project coordinator must submit Joint Application Form to Call Secretariat before the deadline set by Call Secretariat. Each national application must be submitted by project partners to respecting national funding agencies according to the deadlines of each particular funding agency. The later deadline set by any national funding agency is relevant only for that particular organization and does not provide an opportunity to submit other applications after respecting deadlines.

Q11: What will happen if all project partners submit national applications but the Joint application Form will not be submitted to Call Secretariat in due date?

A11: The project will be considered as not submitted to the call.

Q12: Is it possible to submit Joint Application Form to Call Secretariat after the deadline?

A12: No. You can submit application on any day of submission process so there is no need to wait for the last minute in order to submit a proposal.

Q13: Is it possible to modify JAF or information stated in online forms after proposal has been submitted and assigned with number?

A13: Yes, you can retract submitted application via BRICS AMS, modify needed information and submit application once again. Please note that you can re-submit application only before the deadline set for online application submission. If application is not re-submitted before the deadline the project considered as not submitted to the Call Secretariat. Also please note that after re-submission of application it would be assigned with new application registration number so the earlier received number will no longer be valid (please make sure that projects partners transmit final registration number to national funding agencies where required). Please also see **Q23** below.

Q14: What is going to happen if some project partner will not submit national application or will be considered as non-eligible by some national funding agency, while the JAF will be properly submitted to Call Secretariat as well as other national applications to respecting national funding agencies?

A14: If a project will still have 3 eligible partners left (all of them requesting funding, see **Q2** above) the project could be evaluated and supported on condition that the non-eligible partner provides a

statement that he is willing to participate in the project on own costs. It is the only option to proceed and it will not be possible to rewrite/modify project proposal to exclude non-eligible partner and re-allocate the tasks between eligible partners.

Q15: Who and how will fund the project in case it is selected?

A15: Each partner in the project will be funded by respecting national funding agency chosen by each particular partner under project submission procedure (stated in JAF).

Q16: How much funds will I get?

A16: Please refer to national annexes provided or contact respecting national funding agency.

Q17: Could Call Secretariat assist me in finding partners for my project?

A17: No, Call Secretariat does not provide partner-search services. Please use other means to find project partners, including specialized partner-search tools (for example BRICS-TTN Platform - <http://brics-ttn.org/>).

Technical questions

Q18: I have problems with registration in BRICS AMS...

A18: The system shows to be working fine so if you have technical problems with registration, they are most probably of a permanent nature and related to specific network configurations. One of the problems that may occur from certain BRICS regional networks is that on new user registration page after user has entered "e-mail" and "password" no further action happens. In this case we suggest to try registration from other PC location or ask your partner from another country to complete registration process for you (as previous call practice showed, after account is registered the further work in BRICS AMS is not affected by certain network configuration restrictions and the problem is common only for registration process, but not other actions, including application submission).

Q19: I have been previously registered in BRICS AMS but do not remember my password...

A19: Please use "The procedure for password recovery in the BRICS AMS". However, there were reported cases when recovery e-mails were not delivered to @hotmail.com, @yahoo.com, @msn.com and @outlook.com servers. If that is the case, please contact Call secretariat in advance to the deadline.

Q20: What files should I attach with submitting application?

A20: We ask to attach completed JAF form downloaded from Call announcement page in *pdf or *doc format. Please note that Call Secretariat does not provide received attachments to BRICS STI FP participating funders if not requested. Therefore if your national procedures for application require that an additional document shall be provided (such as CVs, Agreements, papers etc.) together with application, that you provide this documents while submitting national application.

Q21: While submitting an application I have "Minimum number of participating countries is 3!" error message, while I have three countries in my application.

A21: This message appears when some required fields for some of the project partner are not completed. Please check if you have filled in all fields for all three partners, including "requested funding" field (if partner participated on own costs – state "0"). Please also see **Q2** above.

Q22: I have submitted an application, how will I get confirmation of submission?

A22: After application submission is completed the status of application on "My projects" page will change to "Registered" and Project number will be changed to "BRICS2019-XXX" (where XXX – your unique number). No notification e-mails or any other type of confirmation will be provided from Call secretariat. Please note that if an application would be retracted and re-submitted, it would be assigned with new unique registration number and previously assigned registration number would no longer be valid.

Q23: How can I modify JAF or information stated in online forms after proposal has been submitted and assigned with number?

A23: You can retract application using "retract application" function on "My projects" page. In order to retract an application, please click on "blue round arrow" (as shown below) and confirm your action.

Please note that application may be resubmitted only before the deadline, if no re-submission of retracted application is made before the deadline, application is considered as not submitted (old registration number is also canceled as result of retract action).
