

Frequently Asked Questions

(ver. 1.0 as of 06.04.2026)

Please note that the following Frequently Asked Questions refer to information on requirements for the projects consortia, application submission procedures as well as provide information on general procedures and rules for the Pilot STI Flagship Projects Call 2026 launched under BRICS STI Framework Programme.

To find out more on particular details related to submission of certain national applications and eligibility criteria set by each particular funding agency, please refer to national annex of that particular funder provided on the Call announcement page at <http://brics-sti.org/?p=new/41>.

Contents:

Q1-Q7: Eligibility of proposals

Q8-Q16: Call procedures

Q17-Q24: Technical questions

Eligibility criteria

Q1: What are the requirements for the minimum size of the project consortium?

A1: To be eligible for the call the consortium must consist of a minimum of 4 partners (all of them requesting funding) from at least 4 different BRICS countries.

Q2: We have 4 partners from 4 different BRICS countries, but not all of them request funding, is such project consortia is eligible?

A2: No, at least 4 partners should request funding and be eligible for funding from respecting national funding agencies. In addition to required number of eligible partners an extra partner can participate in the project on own costs (as well as request funding).

Q3: How many partners can participate in one project as maximum?

A3: The project consortia can have partners from all BRICS countries, represented by respecting funding agencies in the call, as well as some additional partner from third countries acting on own costs.

Q4: Who is eligible for the call?

A4: Eligibility criteria are set by national funding agencies and may vary from country to country and even from one national funder to another within one country. Please refer to the national annexes of respecting national funders, national call announcements or contact national funding agency directly to find out more on eligibility criteria.

Q5: Can applicants be involved in more than one project?

A5: The BRICS STI FP does not regulate this clause and it is completely regulated by national funding organizations and their policies. Please refer to national annexes or contact relevant national funding agency.

Q6: Who is project coordinator and how to choose it?

A6: For the BRICS STI FP Secretariat project coordinator is a project partner who submits project application to the call Secretariat and serves as a communication point for the whole project. So, project consortia should choose between themselves who of the project participants will act as a Project Coordinator. Project coordinator will be obliged to report to the BRICS STI FP Secretariat upon request (including urgent issues and project reports), so it is preferable that project coordinator is a partner who actually coordinates the project activities (if such role exists in the project). However, it is completely up to project partners to decide whom to formally nominate as a formal Project Coordinator and how to structure internal coordination of a project.

Q7: Is it necessary to provide a collaboration agreement with the proposal?

A7: The BRICS STI FP Secretariat does not request to provide any drafts or signed collaboration agreements. However, some funding agencies may require some additional documents to be provided in attachment to national application forms. In this case please contact your national funding agency to consult on the type and nature of documents to be provided in addition to certain national applications.

Procedures

Q8: So many applications and deadlines for proposal submission, I'm confused. Who and how should submit applications, can you make it simple and explain once again?

A8: Project Coordinator must submit 1 proposal (Joint Application Form) to the BRICS STI FP Secretariat (via BRICS STI FP AMS at <http://ams.rfbr.ru/BRICS/>). Other project partners do not have to submit any additional proposals to the Secretariat, so **only one JAF submission per single project is required**. However, each project partner (including Project Coordinator) in addition to submission of JAF to the

Call Secretariat must submit national application to respecting national funding agency (in accordance to the rules of those national funding agencies). So to sum up: each project partner submits national application to national funder and additionally Project Coordinator submits JAF to the call Secretariat (please read next question on the deadlines).

Q9: There are different deadlines and timelines for submitting applications to BRICS SIT FP Secretariat and national funding agencies, which one to follow for our project?

A9: Project coordinator must submit Joint Application Form to Secretariat before the deadline set by BRICS STI FP Secretariat in respecting call announcement. Each national application must be submitted by project partners to respecting national funding agencies according to the deadlines set for this call by each particular funding agency. The later deadline set by any national funding agency is relevant only for that particular organization and does not provide an opportunity to submit applications to other funding organizations or Secretariat after respecting deadlines set by them. Usually the national deadlines are set a few days later after the deadline set by BRICS STI FP Secretariat, so project partners could obtain JAF registration number and provide it with national application if requested.

Q10: What will happen if all project partners submit national applications but the Joint Application Form will not be submitted to call Secretariat in due date?

A10: The project will be considered as not submitted to the call.

Q11: Is it possible to submit Joint Application Form to call Secretariat after the deadline?

A11: No. You can submit application on any day of submission process so there is no need to wait for the last minute in order to submit a proposal.

Q12: Is it possible to modify JAF or information stated in online forms after proposal has been submitted and assigned with number?

A12: Yes, you can retract submitted application via BRICS AMS, modify needed information and submit application once again. Please note that you can re-submit application only before the deadline set for online application submission. If application is not re-submitted before the deadline the project is considered as not submitted to the BRICS STI FP Secretariat at all, despite it was earlier assigned with registration number. Also please note that after re-submission of application it would be assigned with new application registration number, so the earlier assigned number will no longer be valid as soon as application is retracted (please make sure that projects partners transmit final registration number to national funding agencies where required). Please also see **Q24** below.

Q13: What is going to happen if some project partner will not submit national application or will be considered as non-eligible by some national funding agency, while the JAF will be properly submitted

to BRICS STI FP Secretariat as well as other national applications to respecting national funding agencies?

A13: If a project will still have 4 eligible partners left (all of them requesting funding, see Q2 above) the project could be evaluated and supported on condition that the non-eligible partner provides a statement that he is willing to participate in the project on own costs. It is the only option to proceed and it will not be possible to rewrite/modify project proposal to exclude non-eligible partner and reallocate the tasks between eligible partners. If such case appears, a Project Coordinator should contact Call Secretariat within 3-day period after national application submissions are closed.

Q14: Who and how will fund the project in case it is selected?

A14: Each partner in the project will be funded by respecting national funding agency chosen by each particular partner under project submission procedure (stated in JAF).

Q15: How much funds will I get?

A15: Please refer to national annexes provided or contact respecting national funding agency.

Q16: Could BRICS STI FP Secretariat assist me in finding partners for my project?

A16: No, Secretariat does not provide partner-search services. Please use other means to find project partners, including specialized partner-search tools.

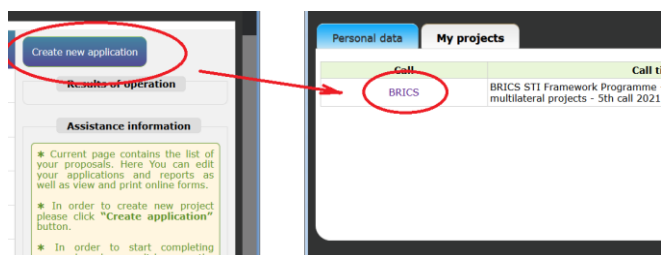

Technical questions

Q17: I have problems with registration in BRICS AMS...

A17: The system shows to be working fine so if you have technical problems with registration, they are most probably of a permanent nature and related to specific network configurations. One of the problems that may occur from certain BRICS regional networks is that on new user registration page after user has entered "e-mail" and "password" no further action happens when attempting to continue registration. In this case we suggest to try registration from other PC/network or ask your partner from another country to complete registration process for you (as previous calls practice showed, after account is registered the further work in BRICS AMS is not affected by certain national network configuration restrictions and the problem is common only for registration process, but not other actions, including application submission procedure).

Q18: How do I create an application?

A18: On “My Projects” page click “Create new application” button on the right side of the page and on the next page with list of open calls click on “BRICS”. After the creation of the application process is completed, the draft of application will appear on the “My projects” page.

Q19: I have been previously registered in BRICS AMS but do not remember my password...

A19: Please use “The procedure for password recovery in the BRICS AMS”. However, there were reported cases when recovery e-mails were not delivered to @hotmail.com, @yahoo.com, @msn.com and @outlook.com servers. If that is the case, please contact call Secretariat in advance to the deadline.

Q20: What file should I attach as part of JAF submission process?

A20: We ask to attach completed JAF form (should be downloaded from Call announcement page) in *pdf or *doc format. No other files are required to be attached. Please note that call Secretariat does not provide collected file attachments to BRICS STI FP participating funders, if not specially requested. Therefore, if your national procedures for application require that an additional document shall be provided (such as CVs, Agreements, papers etc.) together with national application, make sure that you provide these documents while submitting national application, but not the JAF.

Q21: Can I upload additional files such as CVs, images etc?

A21: As part of Joint Application Form submission process we request to attach only completed JAF form (PDF format is preferable). All other supporting documents (CVs, Agreements, Letters of Support etc.) are not required. If you need to provide any images as part of your project description, they should be inserted in the respecting fields of attached Joint Application Form.

If any additional documents are required to be provided by a particular funding agency, those documents should be provided as part of national application.

Q22: While submitting an application I have "Minimum number of participating countries is 4!" error message, while I have four countries in my application.

A22: This message appears when at least one of the required fields for some of the project partner is not completed. Please check if you have filled in all the fields for all four selected partners, including

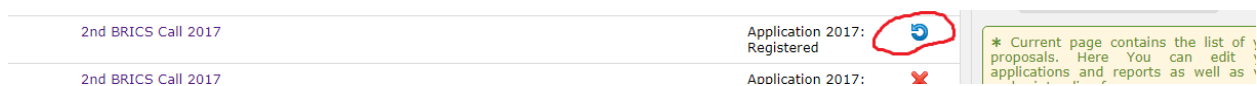

“requested funding” field (if a partner participated on own costs during certain period – state “0”). Please also see **Q2** above.

Q23: I have submitted an application, how will I get confirmation of submission?

A23: After application submission is completed the status of application on “My projects” page will change to “Registered” and Project number will be changed to “BRICS-f2025-XXX” (where XXX – your unique number). No notification e-mails or any other type of confirmation will be provided from BRICS STI FP Secretariat. Please note that if an application is retracted and re-submitted, it would be assigned with new unique registration number and previously assigned registration number would no longer be valid and appear in the BRICS AMS system (see **Q24** below).

Q24: How can I modify JAF or information stated in online forms after proposal has been submitted and assigned with number?

A26: You can retract application using “retract application” function on “My projects” page. In order to retract an application, please click on “blue round arrow” (as shown below) and confirm your action.

Please note that application may be resubmitted only before the deadline, if no re-submission of retracted application is made before the deadline, application is considered as not submitted (old registration number is also canceled as result of retract action).
